

# PerformanceGuard Foundation

If you need to update your knowledge of PerformanceGuard you should attend this course.

## Course description

The course is directed at systems administrators with responsibility for IT operations or employees in Service Desk. The course is offered primarily in Danish, but also in English, and with English course material.

After attending the course the course participants will be able to transfer data into information by use of PerformanceGuard and will know how to present this information to for instance Help Desk/Support, Operations or Management.

The following subjects will be covered:

### Basic review of PerformanceGuard monitoring

- Fundamental understanding of measurements

### Retrieval of performance data

- Presentation of retrieved data at the right level to colleagues, managers etc.

### Reporting

- Retrieval of reports, which visualise relevant performance to the receiver
- Configuring automatic report generation and subsequent mail forwarding

### Set-up of new locations

- Configuring the dashboard, so that it reflects your organisation and the daily working routines

### Set-up of monitoring of new applications

- Adding client/server applications, such as Outlook, SAP etc.
- Adding web based applications such as intranet, SalesForce etc.

### Set-up of alerts

- Evaluating the level of a baseline
- Sending alerts to a certain receiver
- Showing alerts on the dashboard

### Advanced functions

- Introduction to the use of "Custom Counters", "Packet Capture" etc.
