

Windows 10 in-place upgrade

The Windows 10 in-place upgrade service gives you a tool that makes it possible to easily upgrade your Windows 10 platform.

Using this consultant service developed by CapaSystems will guarantee you a streamlined Windows 10 in-place upgrade.

SIMPLE UPGRADE OF YOUR OPERATING SYSTEM

You do not need to:

- spend resources on one of the IT Department's most time-consuming tasks
- developing yourselves a package that will ensure that your operating system is updated
- upgrade or reinstall all of your company's computers manually—at the risk of losing local data

Streamlined Windows 10 in-place upgrade

Windows 10 in-place upgrade

THIS IS HOW WE DO IT:

- A compatibility check is run for all computers in order to identify if they are ready for upgrade
- The existing and the new Windows version will be compared before the installation to prevent unnecessary (double) upgrades and to take into account existing language packages
- A clean-up package is run in the end to ensure that all old installation files and temporary data are removed
- The upgrade history is logged, which provides an overview and can continuously be used for troubleshooting

This is a consulting service that saves your IT Department a lot of time. You do not have to develop the solution yourselves and can thereby be certain that the Windows 10 in-place upgrade proceeds as smoothly as possible.

At the same time, you will always be able to get in touch with one of the skilled consultants of CapaSystems, who will help with the implementation and test that everything is the way it should be.

Windows 10 in-place upgrade

Advantages of Windows 10 in-place upgrade

- Simple upgrade of your operating system
- Time-saving service that you can keep up-to-date on yourselves
- Option for keeping earlier customisations and tailored programs
- Language packages are handled before the upgrade and are restored afterwards
- Old installation files and temporary data are subsequently removed
- Complete overview and history of all computers—which ones can be upgraded and which ones have already been upgraded?
- High-quality software packages—designed by experienced consultants from the CapaSystems Consultant Team
- Delivery of a thoroughly-tested software package
- Uniform client platform with easier troubleshooting

Using this consultant service developed by CapaSystems will guarantee you a streamlined Windows 10 in-place upgrade.

Allow us to take care of these tedious and rather time-consuming tasks so that you can spend your own time on developing your IT business.
