10 KEY ARGUMENTS

Stop wasting time searching for the proper drivers - over and over again. Let CapaOne Drivers take care of the task - once and for all.

Our new whitepaper reviews the key arguments for always keeping your drivers updated, which are crucial to ensure higher IT security and good performance.

We provide you with the top 10 arguments for automatically keeping your drivers updated!

-
- ☑ **Save time and resources:** Automatic driver updates save time and hassle by eliminating the need for manual identification and installation of drivers on each computer model.
 - ☑ **Improves IT security:** Automatic updates ensure that the system is constantly running with the latest driver updates, which can protect against vulnerabilities and threats.
 - ☑ **Increases system performance:** With the latest driver updates, the system can run more efficiently, improving the user experience.
 - ☑ **Reduces the risk of hardware failures:** Outdated drivers can cause hardware failures that cost the organization time and money. Automatic updates can reduce this risk.
 - ☑ **Simplifies IT administration:** Automatic driver updates can save IT administrators time and work by reducing the need for manual maintenance.
 - ☑ **Easy to implement:** An automated driver update solution can be easily integrated into existing systems and infrastructure.
 - ☑ **Improves user experience:** With updated drivers, users can experience better performance and fewer problems with their computers.
 - ☑ **Ensures compliance with different standards:** An automated driver update solution can help ensure the organization's compliance with different criteria.
 - ☑ **Reduces the risk of system crashes:** Outdated drivers can lead to system crashes and downtime, which can be very expensive for the organization.
 - ☑ **Cost-effective:** Automatic driver updating can help avoid costs associated with manual updates, system crashes, and hardware failures. Overall, it can be a cost-effective solution.

SAVE TIME AND ENHANCE IT SECURITY WITH CAPAONE DRIVERS

Get automatic updates for your drivers and avoid time-consuming and risky manual updates.

Automatic driver updates can save IT employees time as they no longer need to spend resources on identifying, downloading, and manually installing the latest drivers.

With an automated solution, driver updates can be installed automatically based on predefined rules or workflows, allowing IT employees to focus on other tasks and be more productive.

Additionally, updates can be performed outside working hours, avoiding disruptions to users' daily tasks.

Easy, manageable - and automatic!

CapaOne Drivers supports **ALL** deployment tools, such as CapalInstaller, SCCM, or Intune.

For over 25 years, CapaSystems' solutions have ensured and optimized IT for Danish and international companies. As a Danish company, we have strong expertise and a deep understanding of the industry. Therefore, there is ample opportunity to benefit from our profound insights and industry knowledge. Simply put, we know what we're talking about.
